WHAT IS THE SECRET GARDEN?

A ceramic garden, made with honesty.

The Secret Garden is an immersive installation by La Errería Architecture Office that brings Spanish ceramic tiles to the heart of London. A contemporary Victorian garden, built entirely from Spanish ceramic tiles. Totems, tables, chairs and miniatures spread across four areas, one for each season.

The piece invites visitors to look beyond appearance. Ceramic is presented not as cladding, but as sculptural matter. Behind every surface there is craft, sustainability, innovation and origin. A Spanish seed, planted at the heart of global design.

We bring a Spanish seed to London. We plant it at the heart of global design. And we let it bloom.
